

**RFQ 22-002  
DESIGN BUILD SKATEPARK**

**ADDENDUM #3**

**Submitted Questions**

- The RFQ states the “skate park shall be completed and available for use by no later than 3/31/23”. As this is a custom design-build project, with a handful of reputable skate park specialists who meet the required qualifications, and the industry is booming right now, is there any flexibility on the completion date? **This date has been set to facilitate an opening before the local school district spring break. This is a hard deadline that will not be changed.**
- The RFQ states “the park must be certified as an Olympic qualifying skate park”. All of our skate parks are regularly used to hold contests and events at the professional level. Where did the City get this information and who is certifying the skate park? **The skatepark will have to be certified by world skate as a competition level street and park course. This is done to be able to host professional Olympic qualifying events.**
